DODD and ODH Collaborate to Present COVID-19 Infection Control Webinar

It is important now, more than ever, to be diligent on mitigating the risk of infection to COVID-19. The Ohio Department of Developmental Disabilities and the Ohio Department of Health are pleased to offer “Applying Infection Control for Department of Developmental Disabilities Settings” on December 9, 2020 from 10:00 – 11:30am.

The webinar will focus on information related to infection control important for all providers in the settings in which they provide services. The session will address the general principles of infection control, identify effective ways to apply infection control to COVID-19 and discuss ways that providers can apply infection control during COVID-19 based on the setting in which they are providing services.
